# ABOUT US

FB Ketju is the largest manufacturer and supplier of conveyor chains in the Nordic countries and a leading global manufacturer of welded conveyor chains for industry. The solutions expertise of our tight-knit team of chain experts, the quality of our materials, and constant manufacturing innovation guarantee that our customers receive safe and high-quality conveyor chain products that are extremely long-lasting.

## ONE KETJU

To streamline operations and guarantee consistent high quality, FB chains are manufactured end-to-end in Finland with European raw materials. Our manufacturing process is driven by advanced welding, machining, and robotic assembly technology. We constantly innovate and develop our production to stay on the cutting edge of a constantly evolving market.

In 1993, we became the first Nordic manufacturer of conveyor chains with a certified ISO 9000 quality management system – a landmark in our efforts that began in 1945 and continue today. FB Ketju received the ISO14001 certificate in 2002 as an acknowledgement for continuous work for the environment.

Our skilled and professional team at FB Ketju stands ready to serve as your ONE stop conveyor chain manufacturer. Our commitment is to be a responsible, long-term partner that's worth your first choice when you need a conveyor chain solution or product – so you never have to stop moving.

**A DURABLE, RELIABLE CONVEYOR CHAIN IS A PROFITABLE INVESTMENT. OUR QUALITY IS YOUR ADVANTAGE.**

## OUR PROMISE: NEVER STOP MOVING

### High quality

Our chains are known for high quality. Their extreme durability benefits from a smart structure and high-quality materials. Our team manufactures the chains from start to finish, so we guarantee the quality 100%.

### Solutions expertise

Over 75 years we have developed trusted chain solutions to customers all over the world. Our chain experts are always ready to help you keep your process material moving.

### Innovativeness

We always strive to find the best chain solutions for the customer. We continuously develop our solutions and production to be more efficient and sustainable.

## FB GROUP

FB Ketju is a proud member of the FB Group, one of the oldest chain companies in the world.

The FB Group is an international collective of businesses working with similar products in similar industries and markets. It has been manufacturing and marketing conveyor chains since 1908.

The autonomous companies within the FB Group either specialize in the manufacturing of a particular product or group of products or distribute the group's products within their local markets. Each has adapted to become a market leader in their own field, from sawmill technology to waste-to-energy.

### Custom solutions worldwide

The strength of FB Group, owned by Swedish listed company Addtech AB, empowers us to act and adapt. Addtech gives us the resources and network of a large organisation, but the freedom to do what we do best – develop custom chain solutions that meet unique customer needs and distribute them rapidly worldwide.

This decentralised approach gives us the power to make decisions and respond to our local markets rapidly, using our own expertise and ways of working to deliver the best results possible for our customers.

**Doing business together means  
our high-quality conveyor  
chain solutions keep  
process materials  
moving all over  
the world.**

# YOUR #1 CONVEYOR CHAIN SPECIALIST

FB Ketju offers a wide range of conveyor chains, sprockets and attachments – standard, customized or specialized – manufactured with European raw materials. We are an adept and sustainable manufacturer specializing in heavy industry, with key segments in cement, wood, paper, mining, metal, power and recycling.

## Power Industry

We supply a wide range of specialized biomass conveyor chains for fuel-handling and de-ashing applications in the biomass industry. Our products are case-hardened and designed to achieve the optimum balance between strength, durability and resistance to wear.

## Cement Industry

Our conveyor chains and sprockets are able to withstand the many varied and arduous demands encountered in cement plants. For example, they can withstand high shock loading with good resistance to wear and superb endurance to fatigue.

## Wood Industry

Our conveyor chain is specifically designed and manufactured to withstand the stringent requirements of lumber yards and sawmills. It is manufactured to resist shock loads while minimizing wear and maximizing fatigue endurance.

## Mining Industry

We supply a wide range of special conveyor chains for various mining applications for both fixed and mobile equipment for both underground and surface equipment.

## Pulp and Paper Industry

Our conveyor chains are specifically manufactured to cope with diverse and conflicting requirements found in pulp and paper mills. Our products are widely used in woodchip handling, drum infeed, bark and de-icing conveyors as well as paper roll conveyors.

## Recycling Industry

We supply a wide range of standard and adapted conveyor chains, sprocket wheels, pins, bushes and rollers for sorting and energy generation applications in the recycling industry.

## Metal Industry

Conveyor chains, sprockets and attachments used in the steel and aluminum industries need to be able to withstand high loads and arduous environmental conditions.

**WE OFFER CUSTOMERS HIGHLY-SPECIALIZED SOLUTIONS FOR MANY INDUSTRIES AND APPLICATIONS.**

## OUR PRODUCTS

FB Ketju offers a wide range of conveyor chain solutions according to various standards from one streamlined production, warehouse, and sales location in Lappi, Rauma. Our product line includes conveyor chains, drop-forged chains, sprockets and conveyor chain attachments – all manufactured with tight tolerances and hewn from high-grade, heat-treated steel.

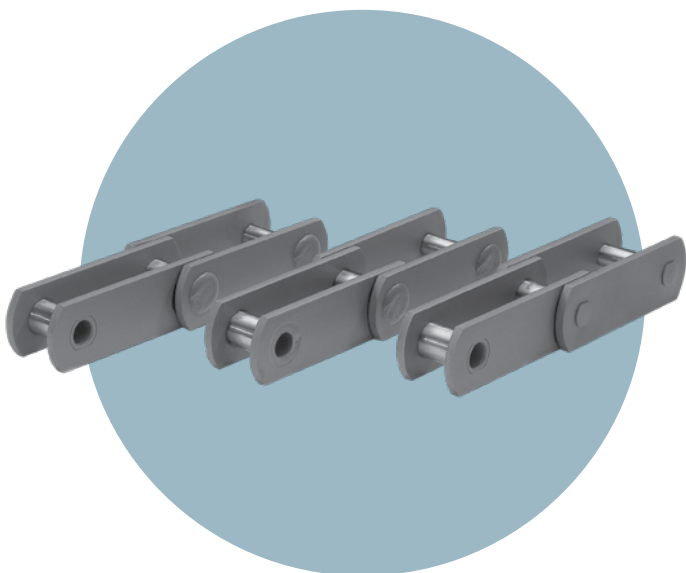

Products are sold mainly through distributors and original equipment manufacturers, but we also work selectively with end-users and maintenance companies.

**For more detailed information and specifications about our products, please see our product specific datasheets on our website [fbketju.com](http://fbketju.com).**

---

### Conveyor chains

Our chains are the result of ongoing R&D, pushing the edge for use in the most demanding applications. Lightweight, long-lasting and strong chains for heavy industry.

### Sprockets

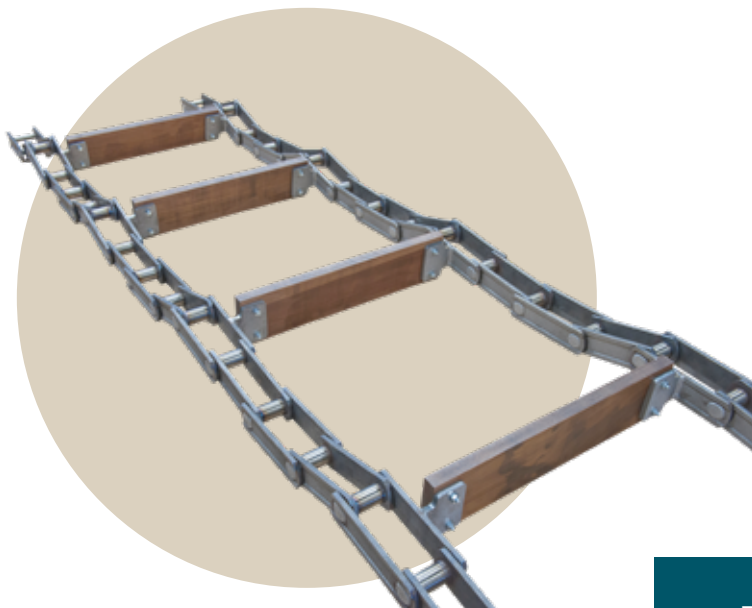

A full range of sprockets for conveyor chain applications and roller chains. Cut with the latest lasercutting technology and finished to ensure the highest quality and consistency.

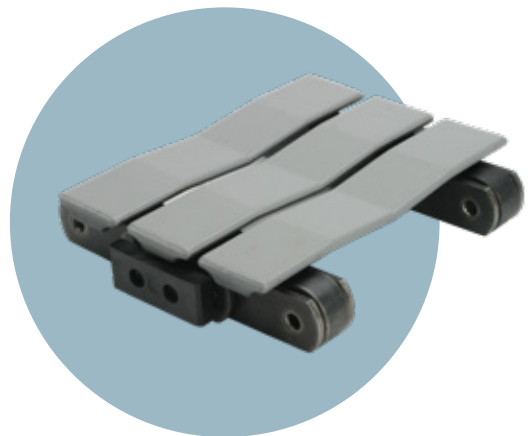

## Attachments and brackets

Your chain, your business – customize your chain from our wide range of attachments. Attachments can be welded directly to the chain or by screw-mounted to welded brackets.

## Special chains

Various type of chains for the materials industry, superior quality chains and sharp-top chains for timber, paper, and pulp – all promise minimal elongation from wear and a long service life.

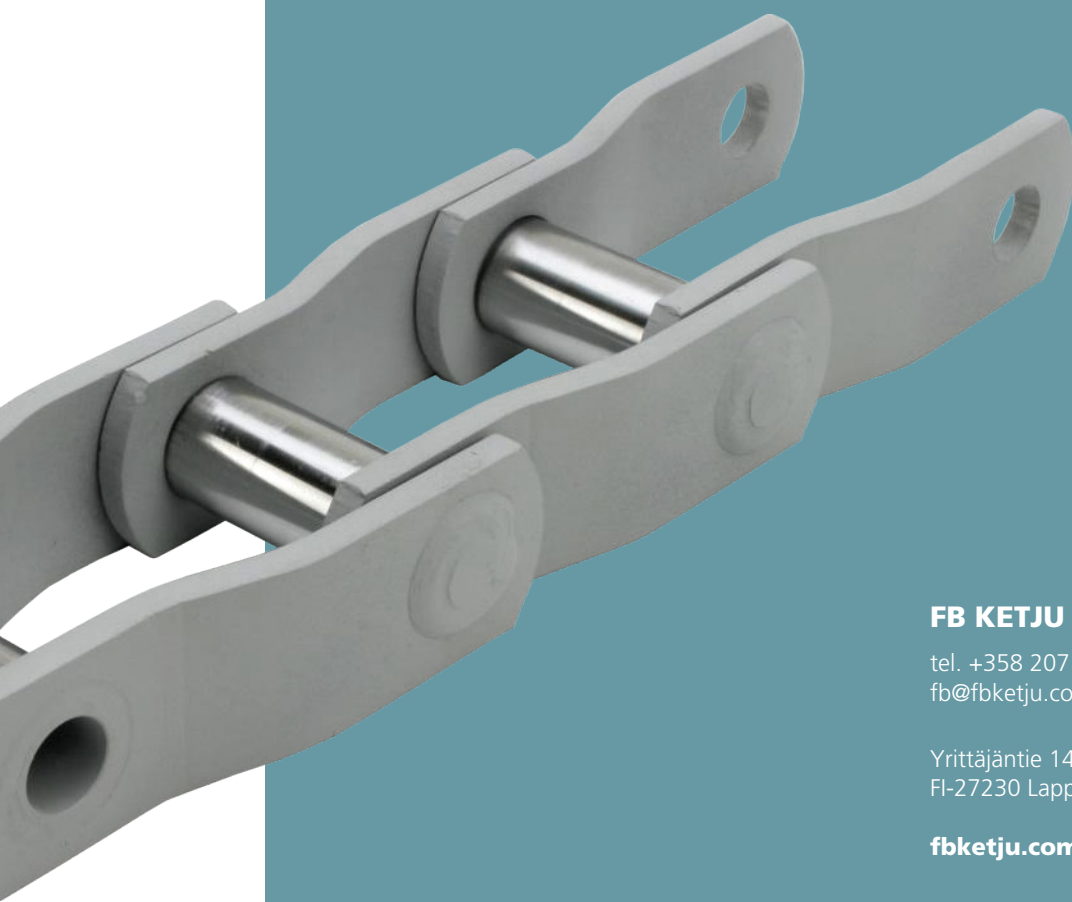

THE MAJOR REQUIREMENTS OF A HIGH QUALITY CONVEYOR CHAIN ARE EXCELLENT WEAR LIFE WITH OPTIMUM STRENGTH AND HIGH FATIGUE RESISTANCE.

## NEVER STOP MOVING

FB Ketju's high quality conveyor chain solutions keep process materials moving all over the world.
